## INFRASTRUCTURE IMPROVEMENTS

In early 2021, the Board of Directors of Fort Bend County Municipal Utility District No. 41 assessed the needs of the District's Water Plant which serves the Village of Oak Lake Community. It was determined that the generator installed at such time was antiquated and was not sufficient to power the Water Plant during emergencies because of its age. As a result, a decision was made to replace the generator. The District has now purchased and installed a new and state of the art generator at the Water Plant. This new generator is one of many infrastructure improvements the District will need to address in the next few years.
